

-Assignment 1

(11/07/2023)

1) input two numbers, perform all arithmetic operations

2) input two numbers, find maximum number

(18/7/2023)

3) input two numbers, find minimum number

4) find given number is divisible by n or not

5) find given number is odd or even

6) find maximum of 3 numbers

7) print number 1 to n using while loop

8) to read 2 numbers and print all numbers from first to second number using for loop.

9) To check whether an alphabet is a vowel or consonant.

10) To check given number is prime or not

11) To find Sum of squares of first n natural numbers $1^2 + 2^2 + 3^2 \dots + n^2$

12) To accept a string and calculate number of digits and alphabets.

13) WAP to calculate total marks, percentage and grade of a student. Marks obtained in each of the three subjects are to be input by the user. Assign grades according to the following criteria :

Grade A: Percentage ≥ 80

Grade B: Percentage ≥ 70 and < 80

Grade C: Percentage ≥ 60 and < 70

Grade D: Percentage ≥ 40 and < 60

Grade E: Percentage < 40

14) Find the area of rectangle, square, circle and triangle.

Assignment -2

15. Declare a blank list. Input the size of the list from user, add elements to the list and print the list. (Hint : Demonstrate use of Append)

16. Declare a blank list. Input the size of the list from user, add elements to the list and print the list. Insert position and new element from user. Reprint the list after insert operation. (Hint : Demonstrate use of insert)

17. Declare a list of 5 integer elements and print the list. Add few more elements and Reprint the list. Also print length of the list. (Hint : Demonstrate use of extend and len)

18. Declare a list of 5 integer elements and print the list. Remove list element. (Hint : Demonstrate use of remove)

19. Declare a blank list. Input the size of the list from user, add elements to the list and print the list. Remove more than 1 elements using iterator method.

20. Declare a list of 5 integer elements and print the list. Remove list element using pop.

21. Create a list of 5 elements and

Write a menu based program to perform slicing operations on list

1. Print elements in a range
2. Print elements from beginning to specific position.
3. Print elements from specific position to end.
4. Print all elements from beginning to end
5. Print all elements in reverse.
6. Exit

22.

Create a tuple of 5 elements and

Write a menu based program to perform operations on Tuple

1. Print all elements of tuple
2. Print specific element of tuple
3. Print total elements of tuple.
4. Check specific item in tuple.
5. Delete tuple.
6. Exit

23.

Create a set of 5 elements and

Write a menu based program to perform operations on set

1. Print all elements of set.
2. Add element set.
3. Remove element from set.
4. Clear the set
5. Delete the set
6. Exit

24.

Create two set of 5 elements each and

Write a program to perform operations on sets :

1. Find difference of two sets and print the results.
2. Perform intersection of two sets and print the results.
3. Perform union of two sets and print the results.

25.

Create a dictionary to store Employeeeno, name deptno, basic salary , DA,HRA, TA.

Write program to perform operations on a dictionary.

1. Access item of dictionary for keyname deptno.
2. Change the basic salary to 8000.
3. Print all values from dictionary.

26.

Create a dictionary to store Employeeeno, name deptno, basic salary , DA,HRA, TA.

Write a program perform operations on a dictionary.

1. Add item professional tax.
2. Delete item TA.
3. Print total items in dictionary.

4. Print all values from dictionary.

Assignment -3

27. To create function to display a string message.

38. Create a Function to Find Maximum of Given 3 Numbers.

29. Create module to perform calculator functions.

30. Accept employee number,name and basic salary,Create Function to compute Gross Salary.Given HRA=10% of basic,DA=90% of basic,professional tax=Rs.200.

31. Write a Program to create a file.Enter your Roll no,Name,Class and Hobbies.

32. Write a program to open file created in program 33 and add new data about city,state and address.

33. Write a program to open file created in program 34 and print the following.

1.)Only first 10 characters

2.)All content of file.

3.)Only first line.

34. Create a function to calculate factorial using recursion.

Assignment-4

35. To create database named “sycait” and create table named “book” within sycait database and insert 5 records.

36. Select all records from book table and display them.

37. update 1 record in book table.

38. Delete one record in book table.
